

Pure, Simple, Fun.

Amundson 11'6"

For those in search of outstanding all-around performance and full volume, the 11.6 offers a fairly flat rocker line and ample floatation for maximum glide. Width is carried from front to back for added stability, while subtle rail shaping keeps the board nimble. Just enough tail rocker and a slight vee aft will remind you that this board is no stranger to surf.

Built in Epoxy AST construction for lightweight and durability. Comes equipped with full EVA deck pad, inset transport handle, and epoxy fin.

Amundson 11'3"

A highly versatile all-around shape optimized for both flat water and surf. Wide footprint provides great stability, while slightly less volume and subtle rail shaping keep the board light and nimble. All-around rocker line blends outstanding glide with great turning ability.

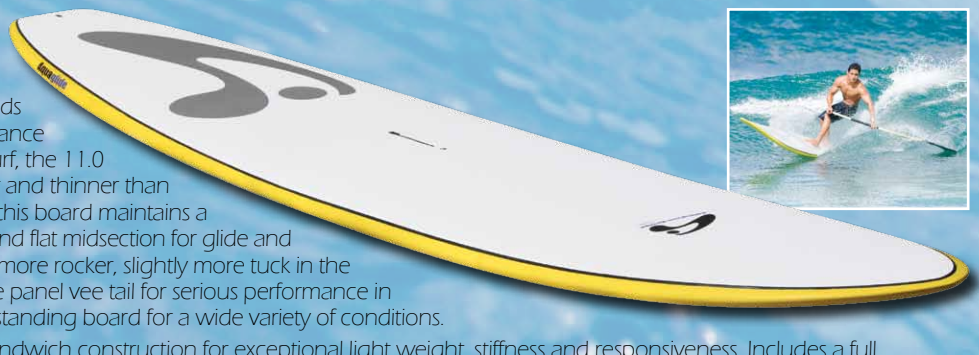

Built in Epoxy ASA construction for lightweight and durability. Comes equipped with full EVA deck pad, inset transport handle, and epoxy fin.

Amundson 11'0"

Geared for the rigorous demands of high-performance paddling and surf, the 11.0 is slightly shorter and thinner than the 11.3. While this board maintains a wide footprint and flat midsection for glide and stability, it offers more rocker, slightly more tuck in the rails and a subtle panel vee tail for serious performance in the surf. An outstanding board for a wide variety of conditions.

Built in epoxy sandwich construction for exceptional light weight, stiffness and responsiveness. Includes a full EVA deck pad, deck box with transport handle, and performance G10 fin.

Amundson 11.6™

Specifications 11'6"L x 30"W ; 212L, ~29 lbs

Amundson 11.3™

Specifications 11'3"L x 29.5"W ; 160L, ~26 lbs

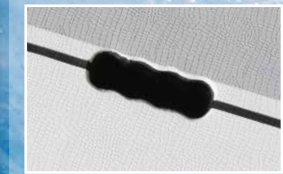

Amundson 11.0™

Specifications 11'0"L x 29.5"W ; 147L, ~23 lbs

When it comes to knowledge of the water, few designers have as much experience as board shaper John Amundson. A true waterman, John lives on the North Shore of Oahu shaping surf, kite, and SUP boards for some of the world's best riders. John brings a wealth of knowledge and experience to the Aquaglide range.

New for 2010
11.3 & 11.6 now come with molded carry handle.

PADDLESURF BOARD BAG

Padded travel bag designed specifically for paddlesurfing gear. Innovative paddle chamber and gear pouch make this bag a necessity. Several molded handles and padded shoulder strap make carrying and loading a pleasure.

Specifications 11'6"L x 34"W
