

Aquaglide

Airport™

Description Platinum™ swim platform/ aquapark base for long-term use.

Specifications 90"L x 90"W x 9"H

This Platinum™ version of our popular Airport™ platform is sure to be a hit with camps, resorts, or anyone looking for a high quality, season-long water platform. Makes a perfect island for swimming, playing or just relaxing. Use as a launching pad for watersports. Convenient boarding handles make for easy access from the water without the need for extra accessories. Modular design allows several units to link together, and provides attachments for a wide selection of innovative Platinum™ accessories. Connect accessories using Interloc™ system. Frequently used with Airport™ Softpac, (not included).

Airport™ Functional Features

SwimStep™

Includes convenient SwimStep™ access platform for easy boarding.

More than just a convenient way to board, the SwimStep™ access platform is the start of your Platinum™ aquapark. The SwimStep™ adds living space to each Platinum™ item! Incorporates heavy duty molded boarding handles, connects to Aquaglide Platinum™ items using Interloc™ system.

Airport™ Technical Features

Duratex™

Commercial grade fabric reinforced PVC material.

Ideally suited for watersports, Duratex™ material is the finest, commercial grade fabric reinforced PVC available. Each Aquaglide Platinum item uses Duratex™ material for maximum strength and durability. The Airport™ incorporates a 26 gauge inner PVC bladder covered with heavy duty 28oz, 500d Duratex™ Material.

RF Weld™

Radio frequency welded seams for high quality and outstanding durability.

'RF' or Radio Frequency Welding is the process used to fuse DuraTex™ material seams for years of trouble-free use. RF welding produces clean, strong seams with no unsightly glue marks or splits.

UP Grip™

Incorporates convenient boarding handles that fold flat.

Convenient climbing handles allow for boarding and/or climbing while staying out of the way for other activities. The Airport™ includes 3 climbing handles.

Interloc™

Heavy duty stainless fittings and convenient Interloc straps for modular use.

Aquaglide Platinum items connect to one another using the Interloc™ system. Soft webbing offers some flexibility, while remaining tough enough for years of service. Only Interloc™ blends the convenience of a cinch with the security of a locking connection.

5 Year

Limited Warranty against any and all manufacturing defects.

Info: Each Aquaglide Platinum™ item offers a warranty covering any and all manufacturing defects for an extended period of time. Airport™ includes a 3 Year warranty for recreational use.

UV Block™ Materials specially treated for high resistance to the sun's damaging rays.

Each Aquaglide Platinum item is treated with UV Block™, the highest grade 3-year UV coating available. While we recommend periodic maintenance with additional UV coatings, there is no substitute for having UV Block™ incorporated into the material right from the start. UV Block™, for years of trouble-free use.
