

Aquaglide

Airport™ SoftPac (sold separately)

Description Backrest lounge with integrated coolers for the Platinum Airport™.

Specifications 30"L x 90"W x 14"H

The Airport™ SoftPac is a 'must have' accessory for anyone serious about lounging. Provides a comfortable backrest as well as three roomy storage compartments for wet or dry items. Easily holds a day's worth of beverages on ice! Includes convenient cupholders. Connects to Airport™ platform using Interloc™ system.

Airport™ Softpac Technical Features

Duratex™

Commercial grade fabric reinforced PVC material.

Ideally suited for watersports, Duratex™ material is the finest, commercial grade fabric reinforced PVC available. Each Aquaglide Platinum item uses Duratex™ material for maximum strength and durability. The Summit™ incorporates 1000d fabric fused with layers of 28 oz PVC.

RF Weld™

Radio frequency welded seams for high quality and outstanding durability.

'RF' or Radio Frequency Welding is the process used to fuse DuraTex™ material seams for years of trouble-free use. RF welding produces clean, strong seams with no unsightly glue marks or splits.

Interloc™

Heavy duty stainless fittings and convenient Interloc straps for modular use.

Aquaglide Platinum items connect to one another using the Interloc™ system. Soft webbing offers some flexibility, while remaining tough enough for years of service. Only Interloc™ blends the convenience of a cinch with the security of a locking connection.

3 Year

Limited Warranty against any and all manufacturing defects.

Info: Each Aquaglide Platinum™ item offers a warranty covering any and all manufacturing defects for an extended period of time. The Rebound™ includes a 3 Year warranty for recreational use.

UV Block™

Materials specially treated for high resistance to the sun's damaging rays.

Each Aquaglide Platinum item is treated with UV Block™, the highest grade 3-year UV coating available. While we recommend periodic maintenance with additional UV coatings, there is no substitute for having UV Block™ incorporated into the material right from the start. UV Block™, for years of trouble-free use.
