

Amundson 10.6

Description Versatile cross-over board for surf, or smaller riders

Specifications 10'6" x 30" x 4 1/4" 158 liters, 24.75 pounds

Item 58-6812106

The 10'6" is a true cross-over design. Paddlers up to 160 pounds will enjoy this board for flat-water cruising, but it is also suited to paddlers of any size who want to use it in the surf. At 30" wide and 158 liters, this board is very stable, making it easy to punch through the shore-break and paddle into waves. This is especially nice when there is choppy water in the line-up. The narrow tail and three-fin set-up make it fun and maneuverable on the wave, while retaining good tracking in flat-water.

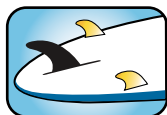

Amundson 10.6 Features

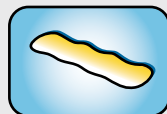

AST

Amundson boards in the All-Around category are semi-custom built in epoxy AST construction for the best balance of light weight, stiffness and outstanding durability.

Thruster

The 10'6" Surf comes complete with a 8.75" center fin and two powerful Future Fins thrusters for optimal performance and maximum grip in tight turns.

Molded Handle

Every Amundson board comes complete with a heavy duty molded handle for convenient transport.

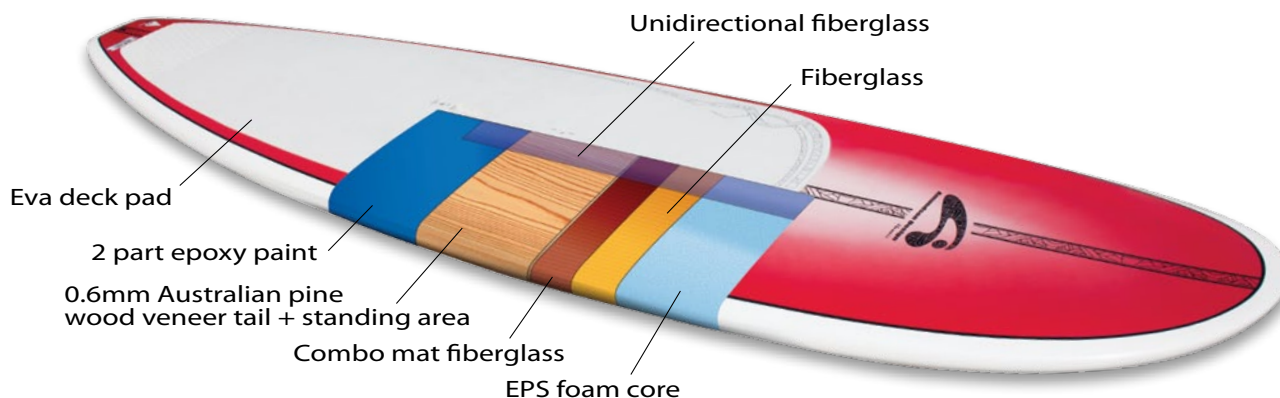

Deck Pad

Every Amundson board comes complete with a 3mm EVA deck pad professionally installed at the factory.

10.6 Cross-Section

Amundson 11.3

Description: Extremely versatile all-around board

Specifications: 11'3" x 29 1/2" x 4 1/4" 160 liters, 26 lbs.

Item 58-6812113

The 11'3" is the most versatile board in the line-up. It has enough length to make it track straight and fast, with a moderate width for stability for entry level riders up to 180 pounds. Thin rails and a little bit of tail rocker remind you that this board was born in the waves of Hawaii. The low volume design helps keep the weight down to a very manageable 26 pounds, which makes it easy for car-topping. Cruise it, surf it, wherever your mood takes you, this board is ready to go. Built in Epoxy ASA construction for lightweight and durability, the 11.3 comes equipped with full EVA deck pad, deck box with transport handle, and epoxy fin.

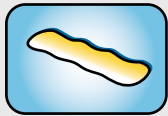

Amundson 11.3 Features

AST

Amundson boards in the All-Around category are semi-custom built in epoxy AST construction for the best balance of light weight, stiffness and outstanding durability.

Molded Handle

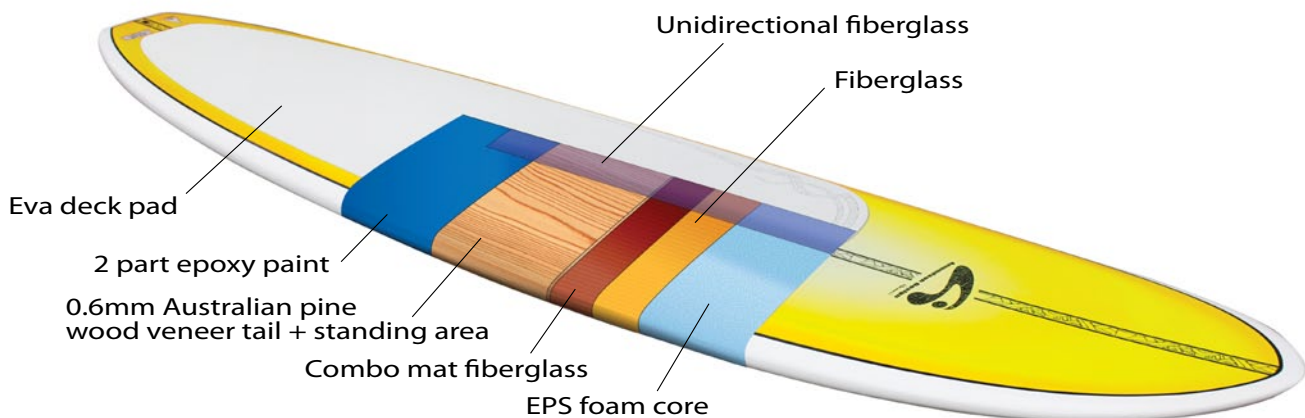

Every Amundson board comes complete with a heavy duty molded handle for convenient transport.

Deck Pad

Every Amundson board comes complete with a 3mm EVA deck pad professionally installed at the factory.

11.3 Cross-Section

Amundson 11.6

Description Outstanding all-around board for larger riders, beginners.

Specifications 11'6" x 30" x 4 1/2" 212 liters, 29 1/2 lbs.

Item 58-6812116

As the biggest all around board, the 11'6" has introduced many people, of all sizes, to SUP. If you are looking for a board for friends and family to share, then this is the ticket. It can handle 250 pound riders, or a whole pile of kids, and first-timers can get started without even getting wet. At 30" wide, with a relatively straight outline, this board is very stable and tracks well with speed. A little bit of tail rocker means you can take it in the surf too. Get in on the action!
