Bravo™ Towable Lounge

Description 8-Person Platinum™ towable and lounge.

Specifications 12'L x 12'W x 30"H

Incredible! The Bravo is both a comfortable lounge and a fully reinforced commercial-grade towable for up to 8 riders. Whether entertaining paying guests or family & friends, you can expect huge smiles and many return customers with this exciting ride. The extra wide 12' size offers incredible stability and performance without the problems of traditional "Banana Boats". When not in towing mode, the Bravo doubles as a swim platform and lounge that can be anchored all season long. Includes a wide assortment of reinforced handles and heavy duty towing bridle. Optional SwimStep TOW access platform allows convenient boarding from the water. Integrates into any Aquaglide park using the Platinum Interloc™ system.

Add to the fun with our optional Bravo Cooler Pac. Holds drinks and ice in two generous compartments. Stows neatly between Bravo seats for convenient access.

Bravo™ Towable Lounge Technical Features

Duratex™

Commercial grade fabric reinforced PVC material.

Ideally suited for watersports, Duratex™ material is the finest, commercial grade fabric reinforced PVC available. Each Aquaglide Platinum item uses Duratex™ material for maximum strength and durability. The Bravo™ incorporates 500d 30x30 fabric fused with layers of 28 oz PVC.

UV Block™ Materials specially treated for high resistance to the sun's damaging rays.

Each Aquaglide Platinum item is treated with UV Block™, the highest grade 3-year UV coating available. While we recommend periodic maintenance with additional UV coatings, there is no substitute for having UV Block™ incorporated into the material right from the start. UV Block™, for years of trouble-free use.

1 Year

Limited Warranty against any and all manufacturing defects.

Info: Each Aquaglide Platinum™ item offers a warranty covering any and all manufacturing defects for an extended period of time. The Bravo™ includes a 1 year warranty for recreational and commercial use.

RF Weld™

Radio frequency welded seams for high quality and outstanding durability.

'RF' or Radio Frequency Welding is the process used to fuse DuraTex™ material seams for years of trouble-free use. RF welding produces clean, strong seams with no unsightly glue marks or splits.

Interloc™

Heavy duty stainless fittings and convenient Interloc straps for modular use.

Aquaglide Platinum items connect to one another using the Interloc™ system. Soft webbing offers some flexibility, while remaining tough enough for years of service. Only Interloc™ blends the convenience of a cinch with the security of a locking connection.

UP Grip™

Incorporates convenient climbing handles.

Convenient climbing handles allow for boarding and/or climbing while staying out of the way for other activities. The Bravo™ includes plenty of climbing handles for easy access.
