

Cascade

Description Drop-stitch inflatable SUP board.

Specifications 10'L x 31"W x 4.75"H

Item 58-5212300

Our inflatable SUP makes the sport accessible to many people who need an alternative to the epoxy composite boards. Once deflated, it packs up into it's own bag that measures 33" x 20" x 9". This makes it easy to transport in the trunk of your car, or by air. No worries about the security of leaving your SUP on the roof of your car, and storage issues are also solved. The soft, durable nature of the Cascade can't hurt you, or any other items in hits, and no board bag is necessary! To enjoy the fun and excitement of whitewater river sessions, a quality inflatable board is the only way to go. You will bounce off the rocks, without cracking your board. Our exclusive fin system integrates a quality foiled fin into it's own finbox, instead of the little flexible glue-on models. Includes a top-quality diamond groove EVA deckpad, carry handle, bag and pump.
