

### Impulse

**Description** Composite SUP board.  
**Specifications** 11'L x 32"W x 4.75"H  
**Item** 58-5212400

New for 2012, the Impulse™ is poised to make its mark. Finally, a composite board at an affordable price! Made using SunTec™ construction, the lightweight EPS core is reinforced with wood stringers and hand-laminated with fiberglass for stiffness, durability and torsional rigidity. The end result is a board that's nothing short of brilliant! Stiff, stable and responsive, the Impulse™ offers the kind of well-balanced paddling performance and durability that one expects from our premier SUP line, but at an even better price. Ideal for emerging users and all-around use. Comes complete with a rigid US fin and deck inserts for gear stowage.

#### SunTec™ Technology

First, the lightweight EPS core is reinforced with two 5mm wood stringers for stiffness and torsional rigidity. Next, the board is shaped and hand-laminated with fiberglass (6oz bottom / 12oz deck) and a durable IXPE bottom sheet to prevent scratches. Tough EVA rail guards are added all around for strength and durability with bomber EVA guards at the nose and tail for extra protection. Finally, the deck is finished with a full PE deck pad for comfort and performance.

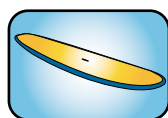

#### Aquaglide Impulse Features

##### Molded Handle

Every Aquaglide board comes complete with a heavy duty molded handle for convenient transport.

##### Full PE Deck Pad

Full PE deck pad for comfort and performance.

#### Impulse Cross-Section
