

Aquaglide

SuperTramp™ 14'

Description 8-sided trampoline with access platform.

Specifications (14') 14'W x 36"H (10' jump surface)

Specifications (platform) 48"L x 48"W

Designed for outstanding bounce and durability, each SuperTramp™ incorporates all the premium features necessary for years of fun. Eight-sided Octane™ frame and six inch powder-coated springs support larger jump surface and provide superior bounce. Each trampoline comes complete with SwimStep™ access platform, heavy duty molded boarding and transport handles and anchor bridle. Choose from a wide selection of innovative accessories to craft your own, unique aquapark. Connect accessories using the integrated Interloc™ system.

Optional Stainless spring kit is available for salt water environments.

SuperTramp™ Technical Features

Duratex™

Commercial grade fabric reinforced PVC material.

Ideally suited for watersports, Duratex™ material is the finest, commercial grade fabric reinforced PVC available. Each Aquaglide Platinum item uses Duratex™ material for maximum strength and durability. The SuperTramp™ incorporates 1000d fabric fused with layers of 28 oz PVC.

HA Weld™

Hot air-welded seams for high quality and outstanding durability.

'HA' or Hot Air Welding is the process used to fuse Duratex™ material seams for years of trouble-free use. HA welding produces clean, strong seams with no unsightly glue marks or splits.

UP Grip™

Incorporates convenient climbing handles.

Convenient climbing handles allow for boarding and/or climbing while staying out of the way for other activities.

Interloc™

Heavy duty stainless fittings and convenient Interloc straps for modular use.

Aquaglide Platinum items connect to one another using the Interloc™ system. Soft webbing offers some flexibility, while remaining tough enough for years of service. Only Interloc™ blends the convenience of a cinch with the security of a locking connection.

Lifetime

Lifetime Warranty against any and all manufacturing defects.

Info: Each SuperTramp offers a lifetime warranty covering any and all manufacturing defects for recreational use.

UV Block™ Materials specially treated for high resistance to the sun's damaging rays.

Each Aquaglide Platinum item is treated with UV Block™, the highest grade 3-year UV coating available. While we recommend periodic maintenance with additional UV coatings, there is no substitute for having UV Block™ incorporated into the material right from the start. UV Block™, for years of trouble-free use.

Aquaglide

SuperTramp™ 14' (continued)

HD Grip™

Incorporates heavy duty molded handles for convenient boarding and/or transport.

Heavy Duty molded handles allow for convenient boarding and/ or transport. The SuperTramp™ includes 2 molded boarding handles.

Octane™ Eight-sided for superior bounce and greater jump surface.

All Aquaglide Platinum trampolines are eight-sided for superior bounce and greater jump surface. Eight-sided Octane™ trampolines allow a much larger 'sweet spot' because the springs pull in different ways. While some springs pull directly to the center, others create an overlapping web of Octane™ power. This overlap means that jumpers are far more likely to land in the sweet spot, producing a vastly superior bounce. Round trampolines pull only to the center of the jump mat so landing even slightly off center is like hitting a golf ball with the side of the club – not very effective.

Supertramp™ Functional Features

Bounce

Incorporates a bouncing feature.

Regardless of your age, few things capture childlike enthusiasm better than bouncing with wild abandon. Bounce for the sky on this Platinum™ item.

SwimStep™

Includes convenient SwimStep™ access platform for easy boarding.

More than just a convenient way to board, the SwimStep™ access platform is the start of your Platinum™ aquapark. The SwimStep™ adds living space to each Platinum™ item! Incorporates heavy duty molded boarding handles, connects to Aquaglide Platinum™ items using Interloc™ system.
