

How to Repair Pump Hose

The hose that comes with the Turbo 12V pump is crush resistant but under some conditions it is possible to kink or crush sections of the hose. Follow the instructions below to repair the hose. **WARNING:** be careful not to burn yourself.

Photo #1 Damaged Hose

Photo #2 Dip Hose into boiling water for 10 seconds .

Photo #3 Let hose cool for a 5-10 seconds and then using your fingers reshape the hose.

Photo #4 Place hose under cold water for 10-20 seconds or until the hose has cooled.
